Summary :

Front-End Developer with 1+ year of experience, focused on building scalable web applications using React and Next.js. Skilled in creating optimized UI components and improving application performance through effective state management.

Skills :

- **Frontend** : JavaScript, React.js, Next.js, Tailwind CSS, Bootstrap
- **State Management**: Redux, Zustand
- **Tools & Platforms**: Git, GitHub, Vercel , Netlify

Professional Experience:

Frontend Developer (Intern) | Creative IT Institute

Feb 2026 – Present

- Delivered 5+ dynamic websites using React and Next.js within a 6-member cross-functional team.
- Integrated REST APIs for dynamic data fetching and built reusable interactive components, achieving 100% cross-device compatibility.
- Reduced page load time by 35% through scalable frontend architectures, clean coding, and advanced performance improvements.

Projects :

CreativeWeb | Interactive Web Platform

Tech Stack : JavaScript, Tailwind CSS

- Developed a high-performance web platform using JavaScript and Tailwind CSS to deliver a highly intuitive user experience.
- Built a 100% mobile-first interface ensuring seamless cross-browser compatibility and strict UI consistency

Live Link : [Creative Web](#) | **Repository Link** : [Creative Web](#)

Orebi-eCommerce | E-commerce Interface

Tech Stack : JavaScript, React, Tailwind CSS

- Architected a fluid e-commerce interface using Lenis for premium smooth scrolling, streamlining the user journey from product discovery to a frictionless checkout UI.
- Integrated React Helmet for dynamic meta tags and applied advanced lazy loading techniques, resulting in a 35% faster load time and enhanced SEO performance.
- Integrated Redux for efficient global state management, significantly reducing unnecessary component renders and maintaining a highly scalable codebase.
